## Take the first step towards optimizing your enterprise. Secure your Starter Kit today and unlock the full potential of your operations!

### Quick and Easy Setup

Launch your network within minutes, with our all-inclusive solution designed for rapid deployment

### Simple to Manage

Our comprehensive network management system, Onyx Connect, streamlines operations, providing real-time insights

### Exclusive Mesh Technology

We're the only private wireless solution offering mesh nodes to bypass costly fiber and extend coverage

### Seamless Integration

Open, fully documented APIs easily integrate enterprise applications, including wireline and Wi-Fi network management

### Cost Efficient Installation

Leverage our patented Cellular Mesh architecture to dramatically reduce time and cost of deployments

### Flexible, Future Proof

Our dual-function Cellular Core enables the flexibility to seamlessly transition from LTE to 5G as needed
